

Ryoji Noyori Prize

sponsored by Takasago International Corporation
and administered by The Society of Synthetic Organic Chemistry, Japan

Ryoji Noyori Prize, sponsored by Takasago International Corporation, was established in 2002 by The Society of Synthetic Organic Chemistry, Japan (SSOCJ) in commemoration of Professor Ryoji Noyori's winning of the 2001 Nobel Prize in Chemistry as well as the 60th anniversary of SSOCJ.

The purpose of the Prize is to recognize outstanding contributions to research in asymmetric synthetic chemistry defined in its broadest sense.

The Prize, which consists of a certificate, a medallion, and \$10,000, is bestowed every year to a recipient meeting the above mentioned criteria. The International Prize Committee selects a recipient, and the recipient shall deliver a prize lecture at the annual general meeting of SSOCJ at which the Prize will be presented.

The Winner of the Prize for the award year 2014 is Dieter Enders, Seniorprofessor RWTH Aachen University, Germany.

Professor Enders is a pioneer in the field of asymmetric synthesis. He has developed first broadly applicable chiral auxiliaries, such as SAMP/RAMP and demonstrated their

efficiency in numerous natural product syntheses. He also established the field of asymmetric carbon-carbon bond formations catalyzed by *N*-heterocyclic carbenes and made seminal other contributions to the field of organocatalysis.

The past recipients:

Henri B. Kagan (2002) Gilbert Stork (2003)
Dieter Seebach (2004) Tsutomu Katsuki (2005)
David A. Evans (2006) Tamio Hayashi (2007)
